Forecast for Sunday 09 Jul 2023

Weather: Cloudy overnight, with some low cloud and fog affecting higher slopes early on. Low cloud clearing by mid-morning, with one or two breaks in high cloud giving sunny spells through to the early afternoon. Heavy and thundery showers then push in from the southwest through the afternoon, frequent at times, with hail and gusty winds possible. Dry overnight.

Chance of cloud-free hill tops above 600m: 30% becoming 90%.

Low cloud and visibility: Banks of low cloud will cover higher slopes first thing, with cloud bases down to 300-400m. This should clear by mid-morning, with broken high cloud comfortably above summits, and remaining so for the rest of the day. Visibility generally very good, but falling to poor or very poor in early low cloud and afternoon heavy showers.

Meteorologist's View

Heavy downpours, lightning, hail and gusty winds near showers will make for extremely treacherous walking conditions during the afternoon and evening. High UV levels are forecast, so having sun protection is essential.

Forecast for Monday 10 Jul 2023

Weather: After a dry start with some sunny spells, showers will develop from mid-morning. A more persistent spell of rain, turning heavy and perhaps thundery at times, is expected during the afternoon, continuing well into the evening.

Maximum wind: South-westerly 15-20 mph, gusting up to 25-30 mph.

Chance of cloud-free hill tops above 600m: 60%.

Low cloud and visibility: Cloud comfortably above summits during the morning, lowering towards 400m in heavy rain during the afternoon and evening. Visibility generally good at first, becoming poor in rain and showers later.

Temperature: **Valleys:** Plus 12 Celsius, rising to Plus 18 Celsius.
At 600m: Plus 10 Celsius, rising to Plus 15 Celsius.
Freezing level: Above summits.
